CENTER

**BRANDING TIME VACCINE RECOMMENDATIONS**  
2011

**Rule #1**

Stay with what has worked for your operation.

**Calves(branding time)**

Ultrabac 7  
Pyramid 5 or Bovishield Gold 5

**IMPLANT** your steer calves with SynovexC  
Fly tags are at your discretion

**Calves(3-4 weeks before weaning for pre-conditioning)**

- 1) Those you're keeping until yearlings  
(i.e. replacement heifers):  
Pyramid 5 w/Presponse  
Ultrabac 7 w/Somnubac
- 2) Those you're retaining ownership on, but  
shipping to feed:  
Pyramid 5 w/Presponse  
Ultrabac 7 w/Somnubac
- 3) Calves you're selling at weaning, keep  
it minimal:  
Pyramid 5 or Bovishield Gold  
Ultrabac 7

**Calves (Weaning)**

Pyramid 5 or Bovishield Gold 5

**Cows and heifers (Pre-breeding)**

Pregguard Gold FP 10-(improved Pregguard 9)

**Profitability tip:** With it's better effectiveness, we recommend utilizing Dectomax injectable at branding on all your cattle prior to grass turnout **and** then Ivomec in the fall at weaning time. Utilize name brand Ivomec, because the quality control on manufacturing is worth the additional cost. **Don't forget to semen test your bulls!**

**WE OFFER COMPETITIVE PRICES ON ALL VACCINES BY KEEPING OUR INVENTORY LOW. GIVE US TWO DAYS AND WE'LL GET YOU SOME GREAT PRICES!!!!!!!!!!!!!!**
